## FIGURES

|   |    |
|---|----|
| 1-8. Maps showing:  |    |
| 1. Location of the New England Coastal Basins study area in Maine, Massachusetts, New Hampshire, and Rhode Island .....   | 3  |
| 2. Physiographic regions of the New England Coastal Basins study area.....  | 5  |
| 3. Mean monthly precipitation and air temperature at selected stations, annual precipitation, and climatic divisions in the New England Coastal Basins study area, 1961-1990..... | 6  |
| 4. Generalized bedrock geology of the New England Coastal Basins study area .....   | 8  |
| 5. (A) Maximum extent of glacial lakes and the marine limit and (B) the generalized extent of stratified-drift deposits .....   | 11 |
| 6. Generalized soil hydrologic groups .....   | 13 |
| 7. Generalized hydrography.....   | 14 |
| 8. Mean annual discharge, mean annual runoff, and location of selected streamflow-gaging stations.....  | 16 |
| 9. Distribution of monthly streamflows for selected gaging stations, water years 1973-93 unless otherwise noted.....  | 18 |
| 10. Maps showing location of dams used for recreation, water supply, and hydroelectric power generation in the study area.....  | 20 |
| 11. Hydrograph showing selected storm hydrographs from unregulated and regulated streams and lakes for a large runoff event (March-April 1987) .....                              | 21 |
| 12. Hydrograph showing daily streamflow regulation on the Kennebec River at Bingham, Maine, June 18-21, 1995.....   | 21 |
| 13. Diagram showing idealized geohydrologic section in the glaciated Northeast.....   | 27 |
| 14. Graphs showing a comparison of monthly median and ranges of water levels in selected observation wells during the 1994 water year.....  | 29 |
| 15-23. Maps of the New England Coastal Basins showing:  |    |
| 15. Ecoregions and fish communities .....   | 30 |
| 16. (A) Population distributions and metropolitan statistical areas, and (B) changes in population density from 1970 to 1990, by subbasin .....                                   | 33 |
| 17. Generalized land use and land cover .....   | 35 |
| 18. Nitrogen (A) and phosphate (B) fertilizer use in 1991, by county .....  | 38 |
| 19. Location of selected industrial and municipal waste-water treatment plants .....  | 40 |
| 20. Location of toxic-release-inventory (TRI) sites.....  | 41 |
| 21. Location of hazardous-waste sites .....   | 42 |
| 22. Total alkalinity of streams and rivers.....   | 45 |
| 23. Mean daily total phosphorus and total nitrite plus nitrate, as N, loading at selected NASQAN sites.....   | 48 |

## TABLES

|   |    |
|---|----|
| 1. Streamflow characteristics for selected gaging stations in the New England Coastal Basins study area, in Maine, Massachusetts, New Hampshire, and Rhode Island ..... | 17 |
| 2. Summary of dams, by major river basin, in 1995-96.....   | 19 |
| 3. Numbers and total areas of lakes and wetlands greater than 0.1 square miles in the major river basins .....  | 22 |
| 4. Geologic units, hydraulic properties, and general water-bearing characteristics.....   | 24 |
| 5. Descriptions of ecoregions.....  | 31 |
| 6. Population of the major metropolitan areas .....   | 32 |
| 7. Land use and land cover, by major river basin, in 1990 .....   | 36 |
| 8. Estimated agricultural production, by major river basin, in 1994 .....   | 37 |
| 9. Summary of total fresh-water withdrawals in 1995, by major basin and source.....   | 43 |
| 10. Summary of public-supply and self-supply withdrawals for domestic use in 1995, by major basin and source .....  | 44 |

## CONVERSION FACTORS, VERTICAL DATUM, AND ABBREVIATIONS

| Multiply metric unit                             | By  | To obtain inch-pound unit         |
|--|---|-----------------------------------|
| <b>Length</b>                                    |   |                                   |
| inch (in.)                                       | 25.4  | millimeter                        |
| foot (ft)  | 0.3048  | meter                             |
| mile (mi)  | 1.609   | kilometer                         |
| <b>Area</b>                                      |   |                                   |
| acre   | 0.4047  | hectare (ha)                      |
| square mile ( $\text{mi}^2$ )                    | 2.590   | square kilometer                  |
| <b>Velocity and Flow</b>                         |   |                                   |
| foot per second (ft/s)                           | 0.3048  | meter per second                  |
| cubic foot per second ( $\text{ft}^3/\text{s}$ ) | 0.02832   | cubic meter per second            |
| gallon per minute (gal/min)                      | 0.06309   | liter per second                  |
| million gallons per day (Mgal/d)                 | 0.04381   | cubic meter per second            |
| <b>Temperature</b>                               |   |                                   |
| degree Fahrenheit ( $^{\circ}\text{F}$ )         | $^{\circ}\text{C} = 5/9 \times (^{\circ}\text{F}-32)$ | degree Celsius $^{\circ}\text{C}$ |
| <b>Hydraulic Conductivity</b>                    |   |                                   |
| foot per day (ft/d)                              | 0.3048  | meter per day                     |
| <b>Transmissivity</b>                            |   |                                   |
| foot squared per day ( $\text{ft}^2/\text{d}$ )  | 0.09290   | meter squared per day             |

In this report, chemical concentration in water is expressed as International Systems Units, in milligrams per liter (mg/L) or micrograms per liter ( $\mu\text{g}/\text{L}$ ). Milligrams per liter is a unit expressing the concentration of chemical constituents in solution as weight (milligrams) of solute per unit volume (liter) of water; 1,000  $\mu\text{g}/\text{L}$  is equivalent to 1 mg/L.

**Vertical Datum:** In this report “sea level” refers to the National Geodetic Vertical Datum of 1929 (NGVD of 1929)—a geodetic datum derived from a general adjustment of the first-order level nets of both the United States and Canada, formerly called Sea Level Datum of 1929.

**Abbreviations:** Abbreviated units used in this report that are not identified in the conversion table include:

|                                  |                                |
|----------------------------------|--------------------------------|
| lbs/ac                           | pounds per acre                |
| $\mu\text{eq}/\text{L}$          | microequivalents per liter     |
| ft/mi                            | foot per mile                  |
| $\text{ft}^3/\text{s}$           | cubic foot per second          |
| in/yr                            | inches per year                |
| km                               | kilometer                      |
| in/mo                            | inches per month               |
| lbs                              | pounds                         |
| $\mu\text{S}/\text{cm}$          | microsiemens per centimeter    |
| kg                               | kilograms                      |
| $\text{lb}/\text{d}/\text{mi}^2$ | pounds per day per square mile |
| $\mu\text{g}/\text{g}$           | micrograms per gram            |
